

SOLV-IT

Product Code: FB00403

Δ [SOLV]_{FOAM}

Detergent and Degreaser

AIM

To provide a high performance, metal safe, product to remove fats, oils and proteins from food industry plant and equipment without the need for chlorine.

SOLV-IT Contains water soluble solvents along with sequestering and foaming agents to provide a heavy duty clean with complete metal safety.

METHOD

This product can be applied using a foaming gun, pressure washer, as a soak cleaner or as a manual detergent. It's safe to use on aluminium and other soft metals.

This product should be used at a dilution of 2%-5% v/v when using a trolley foamer, Hydrofoamer or centralised foaming system. The product can be used at any temperature but as with all detergents best results are achieved with warm water.

RESULTS

Whilst strong enough to be used as an engine degreaser **SOLV-IT** is suitable for use in food production plants and is safe on all materials. **SOLV-IT** is excellent as a spray and wipe cleaner for greasy food areas.

For complete plant sanitation **SOLV-IT** should be followed by NON-RINSE SANITISER.

**FEATURES**

- Detergent and degreaser.
- Metal safe.
- SOLV-IT is made in accordance with HACCP and GMP guidelines.

BENEFIT

- Reduces the number of products used in plant sanitation.
- Can be used on all plant and equipment.
- SOLV-IT is suitable for use in all Australian food manufacturing plants.

Packaging 20 L, 205 L, 1000 L.
