- ✓ Non greasy
- ✓ Provides protection for mechanics & industry workers
- ✓ Contains Coconut Oil to soothe dry & irritated skin
- ✓ Creates a moisturising barrier

FOAMING BARRIER CREAM

Cyndan **Barrier Cream** provides protection from workplace contaminants which can irritate hands and skin.

The high concentration of coconut oil assists in the relief of dry and irritated skin caused by physical and chemical contact. It also contains beneficial ingredients such as Allantoin and Lanolin which are proven to soothe irritated skin and prevent drying and cracking.

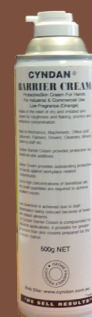

The formulation allows it to penetrate the dermal layer, creating an 'invisible glove', moisturising barrier. This makes it ideal as a barrier and protection for mechanics and industry workers as it is not greasy and will not make hands slippery.

Barrier Cream makes hands easier to clean and is suitable for a range of industries including painters, labourers, miners, kitchen staff, cleaners and many more.

SIZE:

500g CAN

IDEAL FOR:

- Mechanics
- Machinists
- Labourers
- Cleaners
