

# CONCRETE WASH

## REMOVES:

- ✓ Rust
- ✓ Mildew
- ✓ Calcification
- ✓ Grease
- ✓ Dirt

Before cleaning with Concrete Wash

After cleaning with Concrete Wash

## POWERFUL MASONRY CLEANER

Cyndan **Concrete Wash** safely removes mildew, rust stains, mineral deposits, grease and dirt from all masonry surfaces.

Excellent for cleaning terrazzo, building and patio bricks, ceramic and quarry tiles, concrete floors and steps.

**Concrete Wash** does not colour or 'burn' the masonry surface. Concrete wash may also be used in cleaning pool filters and other plastic equipment.

The addition of Phosphorylated Ethoxylate in **Concrete Wash** provides a deeper penetration and more thorough clean even though it is not as acidic as many similar products of its type.

Ideal for pool surrounds, workshop and food processing floors, monuments, streetscapes etc.

Once surface has been brought back to its original condition, keep cleaned area looking pristine by sealing the substrate with Cyndan **Micro Inviso Shield**, an invisible shield against grime.

## SIZE:

1L, 5L, 25L, 205L

## USE ON:

- Terracotta
- Concrete
- Stone
- Brick
- Tiles
- Workshop floors
- Monuments
