

# DURAFILM

- ✓ Versatile polish and protector
- ✓ Utilizes premium silicone
- ✓ Water soluble
- ✓ Provides longer life, ease of cleaning and enhanced appearance of all surfaces treated

## VERSATILE POLISH AND PROTECTOR FOR THE BEAUTIFICATION AND PROTECTION OF MOST SURFACES

Cyndan Durafilm utilizes one of industry's most versatile and well known products, silicone. There are endless varieties and grades of silicones.

In keeping with Cyndan's aim for quality products only the finest grade silicones are used in the preparation of **Cyndan Durafilm**. Its complex blend of silicone oils will nourish, restore and protect leather, vinyl, rubber, timber and chrome.

*Dimethyl Polysiloxane* is the dominant silicone in this emulsion. It has been selected for its superior residual coating and high temperature tolerance.

*Dimethyl Polysiloxane* is the premium silicone for resisting chemicals, water, oils, greases and other contaminants. This protection provides longer life, ease of cleaning and enhanced appearance of all surfaces treated with **Cyndan Durafilm**.
