

# HIGH SOLVE

- ✓ Dissolves heavy grease and oil deposits
- ✓ Spray, dip or brush methods are all successful for application
- ✓ 63°C flash point
- ✓ Highest flash point of all Cyndan degreasing solvents

## HIGH FLASH POINT SOLVENT AND HEAVY DUTY DEGREASER

Cyndan **High Solve** is a blend of several liquid hydrocarbon solvents making it extremely effective in dissolving heavy grease and oil deposits.

**High Solve** is a solvent blend and is formulated primarily for economy. **High Solve** has the highest flash point of all Cyndan degreasing solvents, i.e. 63°C.

Oils and greases are quickly dissolved and removed from the cleaned surface. **High Solve** can be used successfully by spray, dip or brush methods.

**High Solve** may be used neat or diluted with any petroleum derived hydrocarbon liquid. However, a reduction in **High Solve**'s flash point and safety will result if diluted.

### SIZE:

1L, 5L, 25L, 205L

### IDEAL FOR:

- Cleaning motors
- Small parts
- Heavy equipment
- Workshop floors

Chemical solutions across multiple industries
