

INSAKILL

- ✓ Kills crawling & flying insects on contact
- ✓ Low irritant pest control
- ✓ Non-toxic
- ✓ Non Aerosol

NON-RESIDUAL CONCENTRATED INSECTICIDE

Cyndan **Insakill** comes in two formulas which consists of four separate active constituents. This variation prevents insect immunity and allows for complete eradication of all unwanted insect pests.

Insakill Water Based with Pyrethrins and Piperonyl Butoxide has specially selected surfactants, which allow for rapid and deep penetration into the insects coat. It has a pleasant odour and is *ideal for indoor applications*.

Insakill Solvent Based contains the well proven actives, Tetramethrin and Bioresmethrin, both of which are present in commercial/industrial volumes in order to provide *great results in the industrial workplace*.
