IRON AND STEEL RUST PROTECTION SPRAY THAT PROVIDES GALVANIC BARRIER

Protects iron and steel against rust corrosion by creating a specialised galvanic barrier in the same manner as hot dip galvanising.

Cyndan Instant Cold Galvanising weathers to the same colour as normal galvanising. It is ideal for steel roofs, gates, fences or wrought iron, boats and marine equipment, air conditioning and heating systems.

Instant Cold Galvanising provides excellent long term protection and is ideally suited to coat any metal parts which require galvanising or touch ups to damaged galvanised parts. One 500g can protects approximately one square metre. Dries to touch dry in 15 to 30 minutes. No primer or other special surface preparation is required.

This outstanding aerosol is 93% metallic zinc which is delivered in a dry film format.

FEATURES:

- Long term protection of iron and steel
- Becomes part of metal
- Creates special galvanic barrier
- Will not become brittle and flake
