

# MOISTURE STRIPPER

- ✓ Displaces moisture
- ✓ Protects against future water penetration
- ✓ Safe to use on all surfaces
- ✓ Lubricates to reduce squeaks and friction
- ✓ Protects from wear and corrosion
- ✓ Stops battery corrosion

## WATER AND MOISTURE DISPLACER FOR CORROSION PREVENTION

Cyndan Moisture Stripper is unlike many similar products of its type on the market. Moisture Stripper was not formulated for the mass handyman market.

Moisture Stripper acts as an industrial corrosion control for electrical and mechanical fittings. After displacing moisture, a residual coating is left, protecting from future water damage and penetration.

Moisture Stripper is a de-watering fluid that penetrates, lubricates and displaces moisture from mechanical and electrical parts, protecting from corrosion and sealing out water.

You might find Cyndan Aerosol Water Displacer which is available in aerosol format to be easier to use than Moisture Stripper for domestic purposes.

Moisture Stripper may be used on metal, plastic, rubber and is particularly good in preventing battery corrosion.

## SIZE:

1L, 5L, 25L, 205L

## IDEAL FOR:

- Hinges
- Doors
- Bonnets
- Boot lids
- Batteries
