

NON PDCB DEODORANT BLOCKS

- ✓ Septic safe
- ✓ Water conserving
- ✓ Non-Toxic
- ✓ Freshens air
- ✓ Biodegradable
- ✓ Blue fragranced & green tablets available

URINAL DEODORIZER BLOCKS

Cyndan Non P.D.C.B. (Non Paradichlorobenzene) Deodorant Blocks offer an alternative urinal maintenance system. Unlike other products on the market that rely upon a fragrance to simply overpower and mask bad odours, **Non P.D.C.B. Deodorant Blocks** provide much more than your average urinal blocks that are little more than fragranced soap blocks.

The active ingredient Hydrogen Peroxide in these blocks chemically neutralizes and removes odour causing deposits. This provides a new level of hygiene and cleanliness to the urinal system with stable fragrances that supply the necessary and complimentary background odour needed to ensure amenity blocks are kept in a fresh and clean condition.

Non P.D.C.B. Deodorant Blocks consist of tablets of compressed per-oxy salts combined with a range of attractive fragrances. The blocks slowly dissolve in the urinal, releasing an active solution of Hydrogen Peroxide, the well known bleaching, deodorizing and sanitizing agent. No other chemical is needed. To clean the urinal, simply flush to ensure 24 hour, round the clock protection.

It is recommended to periodically brush some fresh solution onto non-contact surfaces around the urinal, as these areas can be a major source of odour. Surfaces remain shiny and are less likely to mark. Old stains will disappear and Uric acid build up will gradually disperse and disappear.

Non P.D.C.B. Deodorant Blocks are based upon a formulated per-oxy salt blend with well established chemistry that breaks down to the elements oxygen, sodium and boron. This means the product has no BOD (Biological Oxygen Demand), and in fact assists the lowering of BOD of waste water by supplying excess DO (Dissolved Oxygen).

KEY FEATURES:	RESULTANT BENEFIT:
• WATER CONSERVING	• Urinal flushing can be greatly reduced
• FRESHENS AIR	• Neutralizes odours, not just a masking agent
• NON-TOXIC	• User friendly and environment friendly
• WORKS AUTOMATICALLY	• 24 hrs a day
• SAVES MONEY	• A similar hygiene using other products will cost considerably more
• RESISTS STAINS	• Surfaces become slippery and shiny, very little sticks to them
• SAFE ON ALL URINALS	• Reduces the risk of disease cross-infection
• BREAKS DOWN SCALE	• Any build up and stain that may have been previously present
• REDUCES CORROSION	• Cleans and maintains sewer pipes and fittings
