The **next generation** air freshener

The Viva!E and Shield dispensers do not use old aerosol or spray technology; they are a new generation of air freshener dispensers and the world's first to use new Oxy-Gen Powered technology.

In an independent process the Oxy-Gen Powered system has been assessed and verified for emissions and energy consumption and was found to have a significantly lower carbon footprint compared to aerosol products in the market.

Most eco-friendly air freshener

Oxy-Gen Powered technology is a clean source of power, producing continuous levels of intense fragrance that contain no propellants, solvents or CFCs – just pure natural scent in a simple, easy to use system without complicated settings and functions, just 24 hour continuous operation.

*"It's good to have an air freshening system that **isn't harmful to the environment.**"*

Consistent fragrance levels - guaranteed

Viva!E is designed and engineered to deliver consistent and continuous levels of fragrance and odour control for the full life of each refill.

Oxy-Gen Powered systems have no moving parts or spray activation so operate silently and continuously making them ideal for public areas, such as...

Nursing & Retirement Homes

Clinics & Hospitals

Restaurants & Food Outlet Stores

Schools and Colleges

SHIELD

Stylish, solid,
unbreakable

STAINLESS STEEL
100%
STAINLESS STEEL

Vandal & **tamper-proof**

Made of robust stainless steel with anti-vandal locking device to give strength and security. The dispenser's smooth contours means that potential vandals are unable to grip and tamper with the system.

Free-flowing air freshness

Shield's unique ventilation design ensures maximum airflow so that fresh fragrance is carried into the room

Deter vandals and still provide a continuously fresh fragrant facility

Dealing with vandalism and theft in public washroom facilities can put a great strain on facility budgets. With the Shield Air Freshening stainless steel dispenser you can prevent dispenser abuse and provide a continuously fresh and fragrant facility that your customers will appreciate.

oxy-genTM
POWERED

Oxy-Gen Powered technology is a new patented medical-grade innovation that harnesses the power of pure oxygen to deliver **continuous, consistent ambient fragrance.**

- › No harmful emissions, solvents or propellants
- › Low VOCs mean it is ideal for green buildings and LEED certification requirements
- › Oxy-Gen Powered products can reduce the amount of VOCs being emitted by up to 90% when compared to aerosol cans
- › The refill is 100% recyclable and safe to dispose of in your regular plastic recycling waste
- › Less waste, safer storage
- › Works against gravity so the fragrance oil won't pool or leak

Consistent fragrance levels - guaranteed

Designed and engineered to deliver consistent and continuous levels of fragrance and odour control for the full life of each refill.

Better for freshness

Most air fresheners work by masking bad odours with heavy perfume. The Viva!E and Shield Air Freshness systems uses a proprietary odour neutralising agent to eliminate, not mask, any bad odours leaving only fresh scent in the air

What is NeutraLox Odour Neutraliser?

neutraLox malodour eliminator

When the fragrance molecules are released, they diffuse into the air in the room. Proprietary NeutraLox odour neutraliser molecules eliminate competing malodour molecules, allowing the fresh scent molecules to spread out and fill the surroundings where they linger in the air.

NeutraLox eliminates bad odours such as tobacco, kitchen odours, sweat, mildew, animal and body odours.

Top quality fragrances

Each has been selected for its intensity; each has been extensively tested for performance over the refill life; each has been field tested for popularity and appeal

! Refills are compliant with

- > Californian Air Resources Board (CARB)
 - > REACH
 - > European Regulations
- and are also exempt from Swiss VOC taxes

A sophisticated fragrance that combines fresh apple notes with amber and spices

A fantasy melon fragrance modified with cool green notes, a hint of citrus and a slightly floral background

An exotic mix of pineapple, tropical fruits and coconut

A pure, clean fragrance of delicate florals and watery notes

Juicy black cherries, hints of almond and plum on a background of vanilla and cinnamon spice

A rich, mouthwatering vanilla fragrance smoothed by hints of warm chocolate and coconut ice.

A tropical sensation that blends light fresh citrus with sweet undertones of Caribbean mango and sunripened papaya

A crisp herbal fragrance with pine, rosemary and tea tree for an environment that permeates clean hygiene

A fresh, invigorating scent with fragrant lavender and spicy herbs

An intensely fruity perfume with hints of orange supported by warm spices
