

# POWER KLEEN

- ✓ Biodegradable
- ✓ Non flammable
- ✓ Economical
- ✓ Water soluble solvent

## WATER SOLUBLE INDUSTRIAL SOLVENT

Cyndan Power Kleen is an industrial solvent which dissolves and emulsifies grease, oil, creosote and heavy industrial soiling, replacing the need for flammable and hazardous petroleum based solvents.

Power Kleen leaves the surface free from chemical residue and prepared for coating or painting if desired. Safe on plastics, masonry, timber, metals and many other resilient surfaces.

Power Kleen contains no aromatic solvents, thus reducing the risks associated with toxic fumes. It is also non flammable which means it can be used on hot surfaces with complete safety. It is highly effective in cleaning greasy surfaces in commercial kitchens and for cleaning kitchen rangehood filters at a 9:1 dilution.

Power Kleen also contains an added rust preventative, to help minimise any costly complications of corrosion.

Also available in a low odour formulation. See Cyndan Power Solve for more details.

Available as ECONO 301 for added economy.

## SIZE:

1L, 5L, 25L, 205L

Suitable for use in AQIS inspected meat and food processing plants

Suitable for use in food preparation areas

## IDEAL FOR:

- Mining / Transport
- Aviation
- Shipping
- Automotive
- Manufacturing
- Commercial kitchens
