

PROTECTA

- ✓ Anti-corrosion treatment and lubricant
- ✓ Non-permanent, removable coating
- ✓ Can be applied by spray, dip or brush methods
- ✓ Can be easily removed by washing with a solvent

ANTI-CORROSION TREATMENT AND PROTECTIVE COATING

Cyndan Protecta prevents corrosion and prolongs the life of tools, instruments, jigs and parts in storage. It seals out weather and moisture, and stops and prevents corrosion on battery terminals and similar cables.

Protecta lubricates close-fitting parts, wire ropes, cables, chains and stops squeaks.

It is not a permanent coating: used where short to medium term protection is required and where the treatment is intended to be removed. The remarkable semi-permanent coating resulting is a highly specialised industrial wax which is liquified by solvent contact, yet is aggressively resistant to corrosion causing contamination.

Protecta can be applied by spray, dip or brush methods, and can be removed easily by washing the treated articles with a solvent such as Cyndan Dislodge.

Suitable for use in AQIS inspected meat and food processing plants.

SIZE:

5L, 15L, 25L, 205L, 1000L

APPLICATION:

- All surface substrates can be protected: timber, aluminium, glass, etc.
- Should be applied liberally by use of a Chapin Sprayer
- When removal of the spatter is required, remove the Protecta film with Cyndan Dislodge
- 1L will cover approx. 10m² of surface area

Category 11 Lubricant
Type B

Approved for use in
registered export meat
establishments
