

SPECIALISED ACID WASH

- ✓ Effective cleaning and brightening of metals and oxidised painted surfaces
- ✓ Powerful combination of acids and fluorides
- ✓ Effective on metals and masonry surfaces

ACID / DETERGENT BASED CLEANSING SOLUTION

Cyndan Specialised Acid Wash has been formulated to provide for the effective cleaning of all metals and oxidised painted surfaces. In addition to removing soiling of all types.

Specialised Acid Wash brightens metals and painted surfaces that are tarnished from oxidisation, rust and welding burns.

TRIPLE ACTION ACTIVES

Three major components in **Specialised Acid Wash** provide a cross linking action covering all soiling types such as greases, oils, soots, soils, diesel fumes, oxidation and rust.

Hydrogen Chloride with Ammonium Bifluoride provides accelerated, deep action, acidic cleansing, whilst Alkylbenzensulfonic Acid adds a soft wash detergent reactive cleanse. The acidic tolerant detergent allows for the removal of fatty type deposits in the food and janitorial industries.

SIZE:

25L, 205L, 1000L

APPLICATIONS:

- Cleaning petroleum based greases, dirt and fatty materials
- Janitorial industry: cleaning shower blocks and toilets
- Vehicle and equipment maintenance: environment soiling, diesel fumes, oils, greases and other contaminants
- Building industry: all applications from new buildings to maintenance
