

THREE IN ONE

- ✓ 1. Cleans
- ✓ 2. Disinfects
- ✓ 3. Deodorises

CLEANER, DISINFECTANT AND DEODORISER

Cyndan **Three In One** is a heavy duty cleaner which performs the three necessary functions of washroom, shower and toilet area cleaners in one simple application.

CLEANS - **Three In One** contains a mild passivating phosphoric acid blend that is used to restore the original lustre to stainless steel urinals, porcelain bowls and tiled areas. It is effective in removing uric acid, light rust and limescale.

DISINFECTS - **Three In One** is certified to eliminate bacteria such as Staphylococcus Aureus and Escherichia Coli (E. Coli) at an 80 to 1 dilution rate.

DEODORISES - **Three In One** eliminates odourous matter and leaves a fresh floral fragrance.

Due to **Three In One**'s powerful cleaning action, it is recommended to be used for a complete monthly clean with Cyndan **Bravo** which can give a hygienic daily clean.

Three In One is also recommended for any area that requires a general acidic cleaner, disinfecting and deodorising. Some users of **Three In One** include Kennels, Catteries and other animal housing areas due to it's ability to control Parvo Virus contamination and pet odours.

For a more aggressive acidic clean to remove tough rust and uric acid stains Cyndan **Tile Clean** would be the most effective product from our range.
