

WASP ELIMINATOR

- ✓ Kills wasps & their eggs instantly & safely
- ✓ Non - flammable formulation
- ✓ Vortex Nozzle
- ✓ Excellent economy

WASP ELIMINATOR AEROSOL

Cyndan Wasp Eliminator is an Australian made product that kills wasps and their eggs instantly and is suitable for indoor and outdoor control of wasps in domestic, commercial and industrial areas.

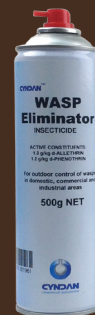

Cyndan has developed the new 'Vortex' Nozzle which ensures an improved droplet dispersion, whilst maintaining up to a seven metre spray distance. This allows the operator to be at a safe distance when eliminating the threat of wasps. The nozzle also prevents wastage of the product that occurs with other inferior nozzles due to the droplet size being too large and product falling to the ground.

Wasp Eliminator has been reformulated and tested to an improved dielectric strength of 54.4 kV and its propellant is non-flammable. This means that the product is safer to use around electrical equipment such as power poles and electrical boxes.

Wasp Eliminator is registered and approved by the A.P.V.M.A. (Australian Pesticide & Veterinary Medicines Authority) and comes in an economical 500gm can.

SIZE:

500g CAN
