

# BIOSECURITY IN HORTICULTURE

**Safe**

**Effective**

**Easy to use**

(hydroponic, glass house,  
or outdoor production systems)

Virkon S® is one of the most proven agricultural disinfectants in the world with broad spectrum efficacy against greenhouse viruses, bacteria, fungi and moulds.

- Fast acting
- Non tainting
- Environmentally friendly

## Use for disinfection of:

### General surfaces

- Use either a plastic watering can, knapsack sprayer or pressure washer on a low pressure setting
- Dilution rate 1:200 (0.5%)

### Foot dips

- Use at the entrance of each greenhouse, replenish weekly or earlier if heavily soiled
- Dilution rate 1:100 (1%)

### Paths and roadways

- Use solution sprayed at a rate of 300mls per sq. metre

### Vehicles

- Wheels, wheel arches, mudguards cleaned to remove mud or organic deposits
- Use Virkon S at dilution of 1:100 (1%), ensuring wheels are sprayed or vehicle is driven through a wheel dip

### Cleaning and Disinfecting Equipment and other non porous surfaces

(e.g. glass, processed metals, leather, plastics, sealed concrete, fibre glass and painted surfaces)

- Dilution rate 1:200 (0.5%)

### Cleansing porous surfaces

(e.g. untreated wood, concrete)

- Dilution rate 1:100 (1%)
