Beloukha[®] Herbicide

The best organic choice for fast weed control
Sunflower derived, bio-based contact herbicide

Beloukha is a non-selective, bio-degradable, broad-spectrum, foliar applied herbicide that acts exclusively on contact, attaching and destroying the cell membrane of the plant epidermis causing rapid tissue dehydration.

Features

680 g/L Nonanoic Acid

Rate 6 – 8 L of product / 100 L of water

Fast acting with visible effects on green plant tissue

Derived from natural occurring substances

Biodegradable

Available in 1L, 5L, 20L packs

Benefits

Highest load Nonanoic Acid on the market

Lower use rates per treated hectare

Rate range gives more flexibility
More treated hectares per spray tank

Most weeds show effects within hours of application

Sourced from Sunflowers
Organic certified – NASAA 6358M

Breaks down into carbon dioxide & water

A pack size for every situation

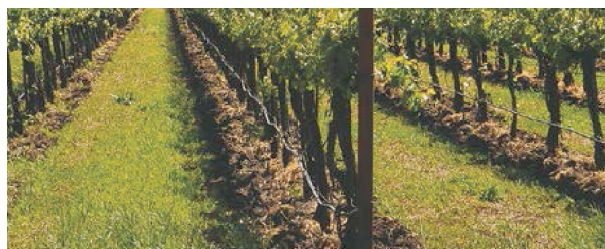

Get results fast

Commercial and industrial

Residential

Vineyards and orchards

Weed control
